

Iman Anooshehpour

Full-stack Engineer — Front-end Engineer

imananoosheh@gmail.com | GitHub | LinkedIn | Portfolio

Professional Experience

- **Software Engineer** HCL Technologies, Vancouver, BC
Aug 2021 - Aug 2023
 - Orchestrate the successful migration of on-site data systems to a scalable cloud ecosystem in a fast paced environment, ensuring high standards of data integrity and reliability.
 - Contributed to a robust cloud ecosystem design which led to 2100% more performant and secure data pipelines
 - Facilitated cross-team collaboration to execute end-to-end pipeline testing, validating data integrity
- **Software Tester Co-op** Nokia, Ottawa, ON
Jan 2021 - Apr 2021
 - Conducted comprehensive testing using automated and manual methods (such as sanity, unit, and regression testing) to ensure adherence to technical standards and project requirements.
 - Developed automated test scripts in Python for cross-database (DB) record validation, showcasing proficiency in building and maintaining quality standards.
 - Tested REST APIs using Postman, contributing to the team's agile delivery of high-quality digital products.

Technical Skills

- Programming Languages: JavaScript ES6 (Expert), Python (Expert), Go (Intermediate), C (Intermediate)
- Front-end Stacks: React, Vite, HTMX, Tailwind CSS, Cypress, Puppeteer, Vue, XState, SendGrid, Zod, Bootstrap, HTML, SASS, CSS, DOM, Unity
- Back-end Stacks: Bash, Node, Express, JWT, CORS, Django, Flask, NginX, crypto-js, tRPC, dotenv, nodemon
- Database Management: MySQL (Proficient), Neo4j (Proficient), PostgreSQL, GraphQL, Cloud SQL, BigQuery
- DevOps Technologies: Docker, Kubernetes (K8s), Ansible, Jenkins, AWS, Git, GitHub Actions, GitHub Pages
- Operating Systems: Proficient in Unix/Linux (Ubuntu, CentOS, Debian), Windows, macOS

Education

- **Master of Applied Computing** University of Windsor, Windsor, ON
Jan 2020 – Apr 2021
- **Bachelor of Computer Engineering - Hardware** IAU, Tehran, Iran
Aug 2013 – Jun 2019

Personal Projects

- **GitHub Contribution Calendar Widget** GitHub Link
 - Developed a scalable dockerized Express.js server with GraphQL query integration for efficient GitHub data retrieval. Demonstrated implementation of digital products with interactive User Interface (UI) and User Experience (UX).
 - Created a dynamic, customizable front-end GitHub Contribution Calendar importable package, adhering to modern UI standards.
 - Authored comprehensive widget documentation, simplifying integration and customization, demonstrating a commitment to collaboration and ease of use in digital product design.

- **Conway's Game of Life** GitHub Link
 - Developed a well-structured codebase using React components and hooks for readability and maintainability, showcasing expertise in UI component design and state management.
 - Utilized the Immer library for efficient handling of immutability in state updates, reflecting a deep understanding of modern UI build processes.
 - Innovatively implemented a feature allowing users to add custom patterns, enhancing interactivity and personalization in UI design.
 - Designed a responsive and user-friendly interface, ensuring the digital product meets high standards of user experience and design system integrity.
- **SysAlert - Intelligent System Monitoring and Notification** GitHub Link
 - Developed a Python script for real-time hardware monitoring using psutil, demonstrating capabilities in building tools that ensure digital product reliability and standards compliance.
 - Implemented dynamic resource averaging for more accurate system resource usage representation, showcasing a meticulous approach to design and build processes.
 - Integrated the ntfy API for customizable notifications, ensuring users stay informed about system health, aligning with best practices in user engagement and collaboration.
 - Automated dependency management for a hassle-free setup process.

Certificates

- Google Cloud Certified Professional Data Engineer - Certificate
- Google Cloud Certified Professional Cloud Architect - Certificate
